**Millionaire's Poor Stomach.**

The worn-out stomach of the overfed millionaire is often paraded in the public prints as a horrible example of the evils attendant on the possession of great wealth. But millionaires are not the only ones who are afflicted with bad stomachs. The proportion is far greater among the toilers. Dyspepsia and indigestion are rampant among these people, and they suffer far worse tortures than the millionaires unless they avail themselves of a standard medicine like Green's August Flower, which has been a favorite household remedy for all stomach troubles for over thirty years. August Flower rouses the torpid liver, thus clearing appetite and insuring perfect digestion. It tones and vitalizes the entire system and makes life worth living, no matter what your station. Trial bottles, 25c; regular size, 75c.

**FRUIT SHIPMENTS**

Will be Record Breaker This Season on Santa Fe.

Owing largely to the fact that it has been using its own refrigerator cars, the Santa Fe railroad company is breaking all records this season for the transportation of California fruit, says a Chicago dispatch. The superin-

tendent of the Santa Fe's fruit line said yesterday that the company would haul during the season more than 17,000 carloads of fruit, which is an increase of 3,500 carloads over last year. It is also said that the total traffic in California fruit over the Santa Fe lines this year will exceed the aggregate traffic by all other lines. Owing to the enormous business which the company is doing in the fruit line an order has just been given for 500 new refrigerator cars, to be delivered as soon as they can be constructed. When these are received the Santa Fe will have over 4,000 refrigerator cars, and will be independent of the Armour car line and other companies operating private cars.

The rapid growth of the Santa Fe's fruit traffic during the last two seasons is largely credited by the officials to the fact that they canceled all their contracts with private car lines, which are said to be unpopular with the California fruit growers, began building their own cars and engaging in fruit trade on their own account. At the same time that the contract referred to was canceled the Southern Pacific determined to follow the same course, but later decided to renew the contract with the Armour car line.

**STORY IS AT WORK.**

**Making Two Surveys for the Northern California Line.**

Chief Engineer W. B. Story of the Santa Fe has returned from a trip to Humboldt county says a San Francisco dispatch.

He says a survey has been completed on the east side of the Eel river, and with the idea of determining the comparative advantages of the two sides of the river in the location of a route for a new road he is now having a survey made on the west side.

While the work is progressing rapidly and satisfactorily the rough character of the country is such that he does not expect to have the surveys in shape to warrant the placing of any contracts for construction work this winter.

While the Santa Fe is busy with its surveys, the California Northwestern is losing no time in the work of extending its line northward to Eureka. President Foster says the construc-

tion of ten miles of road from Willis northward, which has been under contract for several months past, was to have been completed by September 15, but on account of little delays it will not be finished and ready for operation before the middle of next month. The company has thirty or forty surveyors at work locating the extension to the northward.

Notwithstanding rumors to the contrary, we are satisfied that the management of the Albuquerque fair will "tote fair" on the ball games. There has been some dissatisfaction in past years, and some of the boys do not enthrall over a professional umpire in the pay of the management; but we are confident everything will be adjusted to the satisfaction of the participating clubs.

Major James R. Waddell of St. Louis, Mo., came in. All of our citizens will remember Major Waddell, who is president of the National colony and sanitarium, was with us this spring.
